

Company Introduction

Our Company is a Fintech company focused on providing technologies and consulting to the credit industry, giving a new perspective to financial institutions' assets. We detect any twist of credit performance and offer tools to manage it, from origination to UTP/NPL. Our artificial intelligence systems analyze big data to find untapped value and to guide strategic decisions.

Through the business intelligence and a stratification of specializations, our Company empowers the Clients to process the activities out of the existing standard: modularity and a reduced timing of the output are the results of such a disruptive method.

The role

We are looking for a qualified Front-end developer to join our IT team. You should be able to translate our company and customer needs into functional and appealing interactive applications. Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application. You will work with the UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

Responsibilities

- Developing user-facing Web Application
- Building modular and reusable components and libraries
- Optimizing your application for performance
- Implementing automated testing integrated into development and maintenance workflows
- Staying up-to-date with all recent developments in the front-end space
- Ensure the technical feasibility of UI/UX designs

Skills And Qualifications

- Proficient with HTML and CSS3 (Box Model, CSS Grid, Flex Box)
- Proficient with CSS pre-processing like LESS and/or SASS
- Knowledge of (at least one) CSS framework like Bootstrap, SemanticUI (Bulma is a plus)
- Proficient with JavaScript and ES6+ syntax and features
- Proficient with Vue.js framework and ecosystem
- Good understanding of node.js stack and libraries (like NPM, Yarn, Gulp, Webpack)
- Understanding of key design principles
- Knowledge of modern Front End patterns and concept like: Redux, PWA, Service Worker, Shadom DOM
